

# BRIGHTSPACE ARCHIVING

POWERED BY K16 SOLUTIONS

## Archive Your Data

Backup your courses, reduce clutter, accelerate WCAG compliance, and secure your data. Practicing good LMS hygiene will keep you compliant.

### What is Brightspace Archiving powered by K16 Solutions?

Brightspace Archiving powered by K16 Solutions allows customers to archive course content and student data on an archiving platform that fully integrates with Brightspace. Institutions can back up their courses and retrieve content at any time.

### Why do I need to archive my Brightspace data?

Backing up and storing your aging course content allows you to secure your sensitive student data, while retaining full access to your courses through K16's deep integrations with Brightspace. Reduce clutter, increase efficiency, and remain compliant by removing unnecessary content from your production LMS environment. **See what a difference better data hygiene can make!**

### What are the Features of Brightspace Archiving?

-  An archive solution that fully integrates with Brightspace
-  Archived content that is fully accessible through an LMS-like interface, not stored in zip files or cold storage
-  Archived course content that can be pushed back to Brightspace with a click of a button
-  An archive solution that takes advantage of cutting edge cloud technology on AWS

## What Brightspace Customers Say

Monroe  
Community  
College

STATE UNIVERSITY  
OF NEW YORK

“ Archiving by K16 Solutions was much faster than cold storage. It’s easier to retrieve what you need, whether it’s content or student data; it’s great to have backups of backups. We’ve had a really good experience with having K16’s Archiving platform as our archiving solution—it’s so helpful.”

**Dr. Andrea Gilbert**, Assistant Director of Virtual Campus, Monroe Community College
