

K16 SOLUTIONS

Scaffold Replace

REPLACE COURSE CONTENT

Convert your course content, such as video files, **in minutes and hours**, not weeks or months.

Scaffold Replace is an automated link replacement and updating service that allows for a more rapid transition to a new technology provider. This service is powered through our proprietary technology and replaces what used to be a manual, resource-intensive process with sophisticated but simple automation.

No other solution but Scaffold Replace gets you off your old technology provider to a new one more effectively, efficiently, or accurately.

“With K16 Solutions, once the video file migration with Kaltura was complete and the content was there for K16 Solutions, they moved it. Immediately. In one day. The first time I learned about what K16 Solutions could do, I didn’t believe it – I thought it was too good to be true, but my skepticism turned out not to be warranted.”

Kevin Downum, Director of Academic Technology,
Arkansas State University

FAST

Using an automated conversion process, K16 Solutions can update your content links across your entire catalog of courses faster than any other option on the market.

ACCURATE

Content files are instantly and accurately updated to the new technology platform.

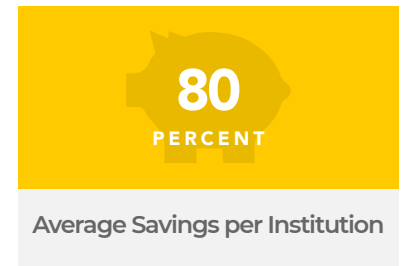

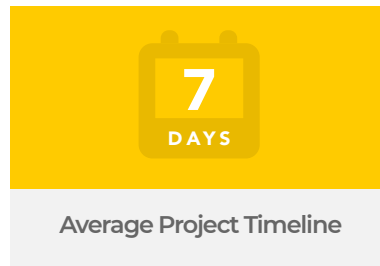

AFFORDABLE

Automation eliminates the need for human resources, significantly driving down costs and timelines.

Scaffold Replace

BY THE NUMBERS

HOW IT WORKS

Migration

New provider will migrate your content to their new platform and provide K16 Solutions with a crossover document.

Access

Provide K16 with access to your LMS platform.

Share

Identify sample courses with content to be converted.

Review

Review sample conversion.

Select

Select set of courses to be updated.

Engage

Engage learners with converted content and engage with K16 Solutions for questions or followup.

Founded by educators, K16 Solutions is eliminating the LMS challenges institutions across the globe have traditionally faced. Using state-of-the-art technology K16 Solutions can quickly and efficiently migrate courses from one LMS platform to another, help faculty more easily build best-in-class courses, archive student data, and provide other custom LMS services.
